

PRESS RELEASE

Sustainability impact of Climate-Smart Agriculture: Balancing Environmental, Economic and Social Pillars

Webinar Highlights

The [BEATLES project](#) is organising an online webinar and workshop, titled “*Sustainability Impact of Climate-Smart Agriculture: Balancing Environmental, Economic and Social Pillars*” on **Wednesday, 21st May, from 10:30 to 12:00 (CET)**. This webinar and interactive workshop will gather researchers, stakeholders, and practitioners to exchange knowledge on how climate-smart agriculture (CSA) can support a more sustainable and resilient food system.

The event will feature a series of expert presentations, including insights from [Oper8](#) and [ICAERUS](#), two synergy projects.

Why Attend?

This webinar is aimed at policymakers, agri-food industry leaders, researchers, farmers, and students. Participants will gain a deeper understanding of:

- **Cost-Benefit Analysis (CBA) of non-chemical weed management practices** - Insights from [Oper8](#)
- **Socio-Economic and Environmental Impact Assessment (SEIA) of using drones as multipurpose vehicles** - Insights from [ICAERUS](#)
- **Sustainability and Behavioural Change Assessment of climate-smart agriculture** - Insights from [BEATLES](#)

In the second part of the event, participants will join a collaborative session to discuss the environmental, economic, and social dimensions of sustainability, from their perspectives.

To view the full event schedule, please refer to the [agenda here](#).
